Microlearning Courses
Health, Safety & Environment Training

Our best-in-class microlearning courses deliver just-in-time training designed to help you achieve better business outcomes and safeguard lives, when and where you need it. Vector Solutions' microlearning courses are derived from our industry-leading Health, Safety and Environment Premium Library, and were developed to *supplement and enhance* your training with courses averaging five minutes in length. Our courses are strategically designed to be utilized as in-the-moment refresher training, and to increase workers' knowledge and skill retention through easily digestible, micro-sized content modules and animated simulations.
